Note If you have a monitor that has a dot pitch of 300 dpi (an image created on a 300-dpi monitor will look sharp on a 240-dpi monitor), the zoom should be set to 100% when viewing the image in Photoshop. Figure 5-5. Check to see that the zoom has the checkbox next to it. You may have to zoom in to make the dotted boxes easier to see. Figure 5-6. The zoom window allows you to scroll to different levels. But once you see an image at 100% zoom, it stays that way, so be sure to zoom back out, and scroll if you need to see the detail. When a zoom level is chosen, the dotted boxes indicate the area of the image you can see. If the zoom box is grayed out, you can't zoom farther. ## QuickTime Player The entire QuickTime website contains information about the functions of QuickTime and multimedia in general, as well as the QuickTime Player application, found on the Downloads page. Protective effect of insulin against malondialdehyde (MDA) induced cytotoxicity in PC12 cells: a possible role for insulin on regulation of cholinergic function. It has been well established that enhanced oxidative stress was involved in neurodegenerative disease process. Herein we demonstrated that insulin, an important regulator in glucose metabolism, decreased the neurotoxic effects of malondialdehyde (MDA) on PC12 cells through anti-apoptotic and anti-oxidative function of insulin. The results showed that MDA has cytotoxicity in PC12 cells, which accompanied by cell morphological change, high LDH release and decrease of cell viability. Conversely, pre-incubation of insulin or compound C (an inhibitor of AMP-activated protein kinase, which functions in the serine/threonine-specific protein kinase family) decreases the MDA-mediated cytotoxicity. The protective effect of insulin has been further confirmed by increased cAMP production and the activation of AMPK. The MDA-induced decrease of cell viability was also reversed by the PI3K inhibitor and the addition of compound C. In addition, pre-treatment with insulin or compound C significantly blocked the MDA-induced increase of phosphorylated c-jun and c-fos, and this effect was enhanced by the inhibition of PI3K. These results suggest that insulin protects PC12 cells against MDA-induced oxidative stress by activation of AMPK and PI3K/cAMP/c-fos/c-jun signaling pathway.In this Oct. 3, 2011 file photo, the logo for CBS airs during a breaking news bulletin on the Chase Utley home run bobblehead giveaway, during the opening day baseball game between the Los Angeles Dodgers and San Diego Padres in Los Angeles. Q: How do I find a line in a rectangle if its red is showing an integer value? I have a rectangle and a line that goes through it. The line red is showing the integer value: I would like to find this line if it fits the rectangle perfectly. How can I do that? A: As written in the comments the problem is non-trivial. Let's say you have the following rectangle: +-----+ | | | | +-----+ The line through the rectangle: +-----+ | | | | +-----+ would look like this: +---------+ | | | | +---------+ A given line through the rectangle can be drawn parallel to one of the sides, or, if you take the corners of the rectangle into account, you can define a quadrilateral. The two alternative solutions are: +-----+ | | | | +-----+ | | +-----+ with possible lines: +-----+ | | | | +-----+ | | +-----+ | | | | +-----+ | or: +-----+ | | | | +-----+ | | +-----+ +-----+ | | | | +-----+ | +-----+ | | | | +-----+ | | +-----+ | | | | +-----+ | | +-----+ | | | | +-----+ | | +-----+ | | |
