Pages Thursday, 2 November 2014 Sports Day for the arts I volunteered to run KCF's Sports Day on 28th July this year. It was a wonderful day. Lots of clubs turned up and the senior students put on some awesome performances and the teachers were the ultimate orchestrators of a packed day. The dance team (in orange) sang rock ballads and ballet wowed through the day dancing in competition, thrilled with their spot at the Recital. The sound team (in blue) were so exited to be performing for an audience and excited to perform in their own school. The captain of the Sword Squad, Maddie, put on a brilliant sword performance, armed with absolutely no blood. So clean! Both clubs also got some awesome raffle prizes, Maddie walked away with this selfie stick. Sophie got a cheese board and it was the best cheese ever! Kevin got an awesome digital camera. The day was the perfect reward for the hard work the clubs had put into their performances. I kept hearing from kids saying "I am so going to come next year!" So for those of you who have an aspiring dancer, it's a great way to get them involved and enthused. I'm sure plenty of children will be signing up in 2015 when I become a gym teacher! As an extra special

Thanks to everyone, seriously! A well-known tabloid told us so: "PewDiePie is not to be trusted" on 4 March, and indeed, he most definitely did not respond with apologies for his racist, homophobic and xenophobic jokes, as we (and many, many other people) have been asking for weeks. I thought it's about time to offer our response so he's not getting away with d41b202975

The video games industry has done wonders in the past two decades. People are now able to experience the quality, immersion, and creativity of games in far more complex and realistic ways than ever before. It was difficult to imagine that the Nintendo Entertainment System could even provide people with the kind of experience they have now in modern games. Well, that's right. Did you know that you could explore a haunted house in a video game? The music genre with the "epic" moniker has always been a big topic of discussion. Will it be a hit or will it be a dud? What is the most epic piece of music that's ever been composed? If you look back at the history of the most popular video game of all time - Super Mario Bros. - you might be able to guess what some of the top choices are. One such choice that could be a heavy contender would be what is now known as "The Super Mario Bros. Theme Song", as the theme to the original Super Mario Bros. game. It's a bittersweet choice, because that one piece of music has now been with us for the last 20 years and it still plays to this day. The Super Mario Bros. Theme Song is a fair example of how popular music can be. This is because of the amount of ways in which it is used. On one hand, you could just play the theme to Mario as background music while you play through the original Super Mario Bros. game. Or you could play through the game and listen to it on repeat, making sure that you do all of the things the game asks you to do. On the other hand, the Super Mario Bros. Theme Song could even be played to wake up to every morning. Or you could listen to it to charge your Nintendo 3DS or Nintendo 3DS XL or New Nintendo 3DS XL, as it is the most iconic video game theme song on the Nintendo 3DS system. Just like the original Super Mario Bros. game, you can even play Super Mario Bros. 2 through this song. One of the best ways to play it through the song would be with the Nintendo Wii Remote, as that's what the game uses to use the theme, which makes sense since you have an entire controller of inputs for the game to take advantage of. Let's talk about another Mario video game in relation to this musical masterpiece. This would be the much-anticipated Super Mario 64.

What's new in Ye Olde Meme Game 2:

.0 Winners Announced - In twenty years of gaming, there has never been a more diverse set of communities than right now. There are few things missing from my electronic world, and my physical house is always a mess because of gaming, but the more hardcore gamers have become, the more diverse the gaming landscape has become. The many types of multiplayer games have especially proven to be very attractive to just about everyone. Not surprisingly, gaming's set of sub-communities has become separated by their "tribes" as strong-willed groups of people with strikingly different lifestyles. I have always enjoyed gaming, and to the surprise of not just me, but many in the community, my aging body can withstand the physical strain of marathon sessions of gaming. However, if I play at all, there are several games to choose from for my leisure enjoyment, and unlike in earlier years, just because one might choose to group themselves with a certain race, city, or gender, doesn't mean everyone has to. Sure, there are some games that call for a certain player experience or a single gender to play, but many games today are designed for being a diverse experience for all types of groups. Even as I have aged and have less time to play games, there are still certain games that are just fun to play even as a single player. The Advanced Dungeons & Dragons 5e game is one of those games that have always made me smile and laugh while playing it. Except for choosing your character and advancing through the more traditional classes, the experience is mostly peaceful and fun. The game takes some time and planning to select a character that is diverse enough to satisfy your taste. When I think about the old GBA game I played, I realize that the graphics weren't nearly as sharp or detailed as the graphics on a video game today. The voice acting was horrible as well, but on the plus side, the game was short, controlled only with single button presses, and it was limited in interactive plots or choices. These aren't complaints, but instead a proper assessment of the merits of a game that has aged very well. I have a feeling one of these days, the President of Cyan Worlds, Monte Cook, will compile a YouTube video game review of the old game, and judging by what myself and other reviewers have found out about the game, it will still be a landmark game. So why did I use the word "tribe" to describe the games various sub-
